

Miracle at the Wellness Preview

Tonight, along with about 30 some others, I was so privileged to be able to witness a miracle at our Wellness Home Center in Cary, NC. Some of our awesome new team mates, Crystal and Darlene are really rare and special people. They have taken on the care of two special needs children. Both children have cerebral palsy. I have been hearing stories about the amazing results these precious angels were getting using our Jade Greenzymes and using a sleep system, but tonight we all got to see the results in person.

The 2 year old, Ashante, functions at a 3 month level. She had no head, or trunk control, and her eyes were in constant motion. After using the JGZ and the travel pad for a few weeks, this beautiful little girl can raise up her head and part of her trunk on her own! Her little eyes are now still.

Tonight, at the WP, after being put on a pet pad, she perched up so big, and smiled a smile that absolutely lit up the room! As her encore, she rolled from her tummy to her back for the first time ever... Twice!

They were told "Jazz" (age 4) would never walk, but he has started walking with some assistance. He is getting stronger and more balanced each day. I don't doubt he will be out of his wheelchair soon.

Though Nikken's pay plan is generous, there is just no price tag we can put on the spiritual compensation we get every time a life is so changed. I thank God every day for putting Nikken in my path...and for this powerful reminder of WHY we have a moral obligation to share these amazing, life changing technologies with everyone we can.

We will keep you updated, on the progress of these tiny angels, as her mom has agreed to document their progress and will share the testimonial as it unfolds.
